

COMPETITION SCORE SHEET

JUDGES NAME:

www.mini-jumps.com

DATE:

① Ponies name or number	② Faults on jumps										③ Total faults	④ Time	⑤ Total	

RULES: Write the name or number of each pony in box ① Use a watch, clock or stopwatch to time each pony as they complete the whole course. To make this longer you can go around the course more than once and add trotting sections around various obstacles in the garden. Each time the Pony has a fault (they knock off a crossbar) then put a number 3 in a box under section ② When they complete the course record their time in box ④ Add up the numbers in the faults boxes and put the total faults in box ③ Now add the time and the total faults together to get their score (boxes ③ and ④) and record in box ⑤ **THE PONY WITH THE LOWEST SCORE WINS!**
To begin with you can just use the faults score and don't worry about timing each go. To make racing closer you can change the 3 for each fault to a 2 or 1.
